

HorseRoster Homepage Copy for Vinicius

Updated launch copy with EquiVault, EquiTag, barn and trainer rosters, and clear account paths for Buyers and Trainers/Barns.

Hero

Headline: Find your next horse.

Subheadline: The modern horse marketplace.

Hero supporting copy: Browse quality horses, explore barn and trainer rosters, manage horse documents in your EquiVault, and share your horse through the EquiTag system.

Primary CTA: Browse Horses

Secondary CTA: Join as a Trainer or Barn

Section 2 - A better way to present horses online

HorseRoster gives every horse a clean, professional profile with the photos, video, and details buyers actually want to see. Trainers/Barns get a roster page to showcase available horses in one place, while buyers get a simpler way to discover, review, and follow horses they are interested in.

Section 3 - Built for modern horse sales

For buyers

Browse horses, review media and details, discover more horses from the same barn or trainer, and access a more professional buying experience from first click to first conversation.

For Trainers/Barns

Create a professional roster, present horses with more clarity, manage horse documents in EquiVault, and share each horse through the EquiTag system.

Professional horse profiles

Each horse gets its own dedicated page with media, details, and a polished presentation that feels far more credible than scattered texts, social posts, and links.

Barn and trainer rosters

Every trainer, seller, or barn can showcase their horses together in one clean, organized roster.

EquiVault

Manage horse documents in one professional place and share limited time access to documents with serious buyers when needed.

EquiTag

Each EquiTag is assigned to one horse and opens that horse's profile first. From there, buyers can explore the rest of the barn or trainer roster.

Section 4 - Designed for two sides of the market

HorseRoster is built for both **Buyers** and **Trainers/Barns**.

Buyers get a cleaner, easier way to discover horses, review information, and connect with confidence.

Trainers/Barns get a more professional way to present horses, manage their roster, and share each horse more effectively.

Section 5 - Why HorseRoster works

Horse sales are still too fragmented. Buyers chase information across text messages, Instagram, WhatsApp, and folders. Trainers/Barns constantly resend photos, videos, and documents. HorseRoster brings everything into one modern, professional experience.

Section 6 - For buyers

- Browse available horses
- View clean horse profiles
- Watch video and review details
- Explore barn and trainer rosters
- Connect with more confidence

Section 7 - For Trainers/Barns

- Create a professional presence
- Organize horses in one roster
- Manage horse documents in EquiVault
- Share horses through EquiTag
- Present each horse more clearly and professionally

Final CTA

The modern horse marketplace.

Built for buyers, Trainers/Barns, and programs who want a more professional way to discover, present, and share horses.

Primary CTA: Browse Horses

Secondary CTA: Join HorseRoster

Implementation notes to keep in the product copy

Use **barn and trainer rosters** everywhere instead of only barn rosters.

Use **Join as a Buyer** and **Join as a Trainer or Barn** as the account entry choices wherever signup starts so the two account types are unmistakable.
