

Vinicius Gamaliel Passos de Souza

Belo Horizonte, MG, Brazil | +55 31 99496-1937 | vinicius@gamaliel.dev

Professional Summary

Senior Software Developer with 12+ years of experience in backend and full-stack web development. Proven success delivering scalable, cloud-based solutions for startups and global companies. Skilled in leading technical initiatives, mentoring teams, and architecting high-availability systems. Combines deep technical expertise with strong communication skills to drive cross-functional collaboration. Actively seeking remote opportunities in the US and Europe.

Technical Skills

Languages & Frameworks: TypeScript, Node.js, Express, Hapi.js, NestJS, Java EE, Spring Boot, Ruby on Rails, Python (Django, FastAPI), HTML5, CSS3, JavaScript, ReactJS, VueJS

Cloud & DevOps: AWS (Lambda, CloudFormation, X-Ray), Terraform, Kubernetes, Docker, CI/CD (CircleCI, GitLabCI)

Databases & APIs: PostgreSQL, MySQL, Oracle, MongoDB, DynamoDB, RESTful APIs

Testing & Tools: TDD, Jest, Mocha, Git (GitHub, GitLab, BitBucket), Jira, Trello, Agile (Scrum, Kanban)

Professional Experience

Senior Backend Developer | LendingOne (Jul 2024 - Present)

- Backend Developer and DevOps Engineer building a serverless application to enhance lending workflows.
- Developed automation systems to pre-evaluate loan applications using real-time client and property data.
- Managed deployment and infrastructure with Node.js, AWS Lambda, DynamoDB, and CloudFormation.

Technologies: Node.js, AWS Lambda, DynamoDB, CloudFormation, JavaScript, DevOps, Serverless

Senior Software Developer | BairesDev / BrightAI (Oct 2023 - May 2024)

- External Consultant focused on backend development and cloud infrastructure.
- Designed Node.js APIs integrating edge devices with cloud systems.
- Implemented AWS and Terraform-based services for internal and client-facing tools.
- Built Kafka-powered solution enabling robust asset-cloud communication.

Technologies: Node.js, Kafka, Terraform, AWS, DevOps, Cloud Architecture

Senior Software Developer | Syngenta Digital (Jun 2020 - Sep 2023)

- Led development of global integration platform unifying enterprise systems.
- Built serverless microservices with Node.js and DynamoDB for contract and entitlement management.
- Developed RBAC and sign-up systems; mentored junior engineers; unblocked complex issues.
- Managed infrastructure with AWS CloudFormation.

Technologies: Node.js, DynamoDB, ReactJS, AWS CloudFormation, Microservices, Java EE

Software Developer | Clipping CACD (Apr 2019 - Apr 2020)

- Introduced Agile and Scrum practices across the development team.
- Built study and exam prep platform using Node.js, React, and Python microservices.
- Conducted code reviews to ensure high-quality output and team alignment.

Technologies: Node.js, React, Python, Scrum, Agile, Code Review

Software Developer | VIK Brasil (Sep 2016 - Sep 2019)

- Lead developer for Ruby on Rails and React-based health gamification platform.
- Built microservices to integrate fitness data for real-time analytics and ranking.
- Designed game mechanics for corporate health promotion using quantified data.

Technologies: Ruby on Rails, React, Python, Gamification, Microservices

Software Developer | Ritech Sistemas (Apr 2015 - Apr 2016)

- Developed Node.js WebSocket server and Java client for remote printing.
- Built restaurant management tools using PHP, JavaScript, and Android.
- Led a small team and collaborated directly with clients and stakeholders.

Technologies: Node.js, Java, PHP, Android, WebSocket, Team Leadership

Intern | CEFET-MG (Apr 2013 - Apr 2015)

- Contributed to Java EE college management system.
- Assisted in testing and quality assurance.
- Adapted open-source helpdesk platform using PHP.

Technologies: Java EE, PHP, Testing, Git, Helpdesk

Education

Professional-Technical Degree: Industrial Informatics

CEFET-MG, Belo Horizonte, MG, Brazil — 2012

Languages

English: Fluent

Spanish: Intermediate
